Summary

Full stack web developer with 7 years of experience configuring Archer software to meet client workflow and data specifications. Timeline-driven and customer-focused with a passion for bridging the gap between the front-end experience and the back-end design. Multifaceted, disciplined, conscientious professional driven to endlessly learn and grow.

Technical Skills

Languages: HTML, CSS, JavaScript | **Technologies**: jQuery, Bootstrap, TailwindCSS, GitHub, GitLab

Projects

Dogtionary: This group project uses HTML, TailwindCSS, and jQuery to call two APIs that display information about adoptable dogs nearby and information about a specific breed.

>   **Deployed Project**: https://kcnancy.github.io/Dogtionary/
>   **Repo**: https://github.com/kcnancy/Dogtionary

Harry Potter Quiz: This solo project uses HTML, CSS, and JavaScript to display a series of score quiz questions. The quiz is timed and includes a scoreboard that uses local storage to keep a list of high scores.

>   **Deployed Project**: https://bmcleod12.github.io/queen-of-the-quiz/
>   **Repo**: https://github.com/bmcleod12/queen-of-the-quiz

Weather Dashboard: This solo project uses HTML, Bootstrap, and jQuery to call two APIs that display information about today's weather in a given city, as well as a preview weather for the next 5 days. It maintains a list of searched cities to quickly pull up data on other cities of interest.

>   **Deployed Project**: https://bmcleod12.github.io/light-as-a-weather/
>   **Repo**: https://github.com/bmcleod12/light-as-a-weather
